Request the Best

Now there is one destination for your Bosch requirements.

MTQ Engine Systems has launched a unique concept to the Australian Automotive Aftermarket: The Bosch Superstore.

For nearly thirty years MTQ Engine Systems has been a strong distributor of Bosch diesel parts. The company has formed a strategic partnership with Bosch to diversify and expand its current product offering to include a full range of Bosch automotive products.

Traditionally specialists in turbocharger, fuel injection and performance parts and servicing, MTQ will now stock Bosch spark plugs, wipers, brakes, starter motors, alternators, filters, ignition products, belts, fuel pumps, oxygen sensors and more. Distribution will be supported by MTQ's national Branch network.

"We have been looking at diversification within the MTQ business and are excited about this opportunity to expand and provide a complete Bosch product range to the Automotive Aftermarket", says Les

Healey, MTQ CEO. "It will allow us to move forward with our growth plans whilst providing Bosch the outlet to be able to supply their full product offering to the trade".

"Request the Best" is the philosophy driving the Superstore, with Bosch's outstanding reputation for quality being supported by MTQ's commitment to deliver the best service.

To deliver a complete package, the Superstore will also carry PBR, one of Australia's leading suppliers of brake system technology. The PBR brake range has recently been coupled with the Bosch brake range to establish the most comprehensive offering of brake products available from a single entity. With a focus on brand, quality and commitment to service, the Bosch Superstore will deliver the complete Bosch range, all from one location, when you "Request the Best".
